Eurosoft is one of the first companies to engage in the Software business in Greece.
Eurosoft was incorporated in 1981, first as a small partnership,
uniquely designed to provide computerized solutions and services.
Since then, the needs of our customers have evolved along with
the increasing demands of our fast paced economy. Eurosoft has risen to the challenge
of providing a service not only sophisticated but tailor made to the specific needs
of our customers. That's the key point that differentiated us from our competitors
and kept us focused to our original goal.
In the last 30 years, business software has become absolutely essential
to the ongoing operation of each and every enterprise not only in Greece,
but all over the world. Currently, Eurosoft along with our partners,
proudly service a rather large portion of the market.
